

# Mutations

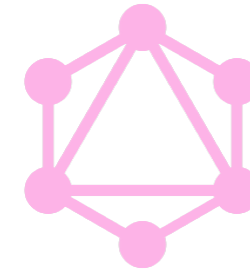

**Mutations** are used to change data it needs from the server. It's known as a **Create, Update and Delete** in **CRUD** operation.

```
type Mutation {  
    createPerson(name: String!) : Person!  
}
```

# Mutating in GraphQL

```
mutation {
  createPerson(name: "Lysandro", age: 25) {
    Id
  }
}
```

```
{
  "data": {
    "createPerson": {
      "id": "10b64872-5a2c-426f-872c-
c138829bf525"
    }
  }
}
```
