

```
type Query {  
  ...  
}
```

```
type Mutation {  
  ...  
}
```

```
type Subscription {  
  ...  
}
```

Introspection

Introspection is the ability to **query which resources are available in the current API schema**. We can see the queries, types, fields it supports.

```
{  
  __schema {  
    queryType {  
      name  
      description  
    }  
  }  
}
```
