

GraphiQL

GraphiQL offers syntax highlighting, code completion, and error warning, and it lets you run and view query results directly in the browser.

```
GraphiQL
                                                                             ✓ Docs
  viewer {
                                             "data"
    login
                                               "viewer": {
                                                "login": "Lysandroc"
QUERY VARIABLES
```
